

One360 Klimax

ECE R129/03, 40-150 cm

Proven safety combined with innovative technology: discover our One360 Klimax with integrated heat and ventilation function now. Thanks to adjustable modes, the "Osannovation" ensures an optimum seating climate depending on the season.

The childhood hero accompanies small passengers in the 40 to 150 cm height category. It accommodates children from birth to 105 cm (maximum 18 kg, approximately 4 years) to safely ride in a rear-facing position with two reclining options. Once they reach 76 cm (at least 15 months), the One360 Klimax can also be utilized in a forward-facing position. Its 360-degree swivel function also makes it easy to get in and out on both sides.

The clever child seat can not only be used throughout the entire child seat obligation, but also offers maximum safety and comfort. A 14-position height-adjustable headrest ensures an optimum fit in every size category. The magnetic holders also make it easier for you to buckle up.

Practical: For use in the 100 to 150 size category, the 5-point harness system is simply stowed away in the child car seat.

- Patented ventilation and heating system: optimum seating climate for the little ones
 - Three adjustable modes:
 - Warming
 - Cooling
 - Automatic
- Rotates 360° for entry and exit from both sides
- Individually adjustable Isofix connectors
- 14-position height-adjustable headrest
- Removable comfort insole
- Additional removable head cushion
- Auto-adjusting 5-point harness system
- Easy handling thanks to magnetic holders for shoulder straps
- Reboard from birth to 105 cm tall (max. 18 kg, approx. 4 years)
- Reboard adjustable in 2 reclining positions (position R1: 40-75 cm; position R2: 76-105 cm)
- Transport in the direction of travel possible from 76 cm (at least 15 months)
- Adjustable in the direction of travel in 4 sitting and resting positions (76-105 cm)
- Easy conversion for use in the 100-150 cm size category: 5-point harness is simply stowed in the child car seat without removal

features

Optimum seating climate for the little ones

Safety note: Klimax technology is only activated when pressure is applied to the sensor located in the seat.

Three adjustable modes:

Warming

Illuminated button: red

In this mode, the back and seat area of the child seat is heated and if the temperature measured inside the seat is below 25 °C, the heating mat is heated to 45 °C. If the integrated sensor measures a temperature of 25 °C, the heating output is reduced and kept constant. If the measured temperature is already above 25 °C when the mode is switched on, the heating output is also reduced to 25 °C.

Cooling

Illuminated button: blue

In this mode, warm air is extracted from the child seat on hot days. This generates a cooling air circulation, resulting in reduced sweating for the small passenger.

Automatic

Illuminated button: green

In this mode, the system itself decides when to heat or extract warm air. If the temperature is below 5 °C, heating takes place automatically and if it is above 30 °C, warm air is extracted.

Technical data

Operating voltage/current consumption	DC 12 V 1.2A
Plug	12 V plug for 12 V on-board power sockets incl. 4.50 m connection cable
Fan	4 pieces, brushless, DC 12 V 0.05 A, housing dimensions: 50 x 50 x 10.5 mm
Heating mat	1 piece, maximum temperature: 45 °C

Dimensions & details

Weight	13.5 kg
External dimensions	W 43 x H 58 x L 48.5 cm
Belt type	5-point harness
Mounting type	40-105 cm: Isofix & Top-Tether 100-150 cm: Isofix & 3-point belt of the car or only 3-point belt of the car

Wide seat	32 cm
Deep seat	31 cm
Backrest height	48-74 cm
Installation direction	Backwards and forwards
Head cushion	40-75 cm
Comfort insert	40-75 cm
