Guide on using quick cam assembly
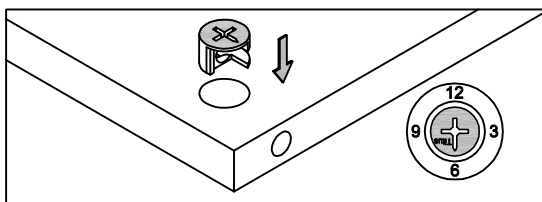

1. Press cam into pre-drilled hole with the arrow pointing toward the side hole. (see 6 O'clock.)

12
9   3
6
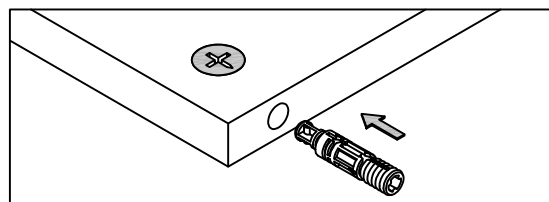

2 . Push the bolt all the way into the side hole.

**3 . With all cam & bolts installed align and push the panels together - NO GAPS (MAKE SURE PANELS HAVE NO GAPS)**

NO GAP
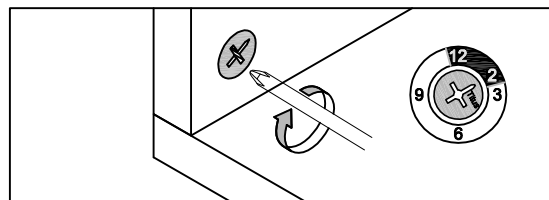

4 . Turn cam clockwise to tighten. Secure connection by turning arrow on the cam to 2 O'clock to smoothly lock panels together.

9 CAUTION, When peeling off LED adhesive strip, take extra care to peel ONLY the protective strip, not the adhesive strip.
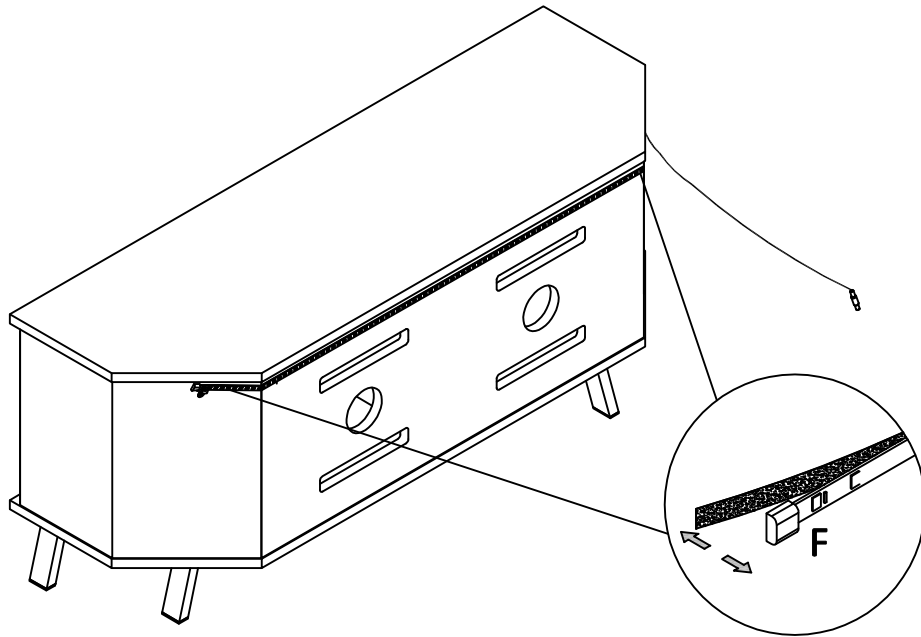

1. Do not remove LED strip backing yet. Place LED strip in position under the clip and lay LED strip in place.
2. Start from the CLIP end, remove the LED strip backing with care and place in position on the edge of the back panel pressing firmly.
3. Gently pull the wires so that the end of the LED strip is straight and sticking in position.

Wall Fixing Installation Instructions: Textile strap

Step 1
Place your product in the final position. Mark the wall with a pencil where corresponding hole will be drilled into wall. Check for hidden gas and water pipes and / or electrical wiring. Drill holes and fit an appropriate wall plug (not supplied) for your wall type. Screw the strap to the wall.
Choose an appropriate screw to secure. If in any doubt please consult a professional.

Note 1
The wall plug and the screw / washer are not supplied as the wall types may vary

Note 2
The require gap between product and the wall is at least 25 mm.

Note 3
The end of the textile straps which are fixed to the wall should be about 25mm lower than the end fixed to the furniture.
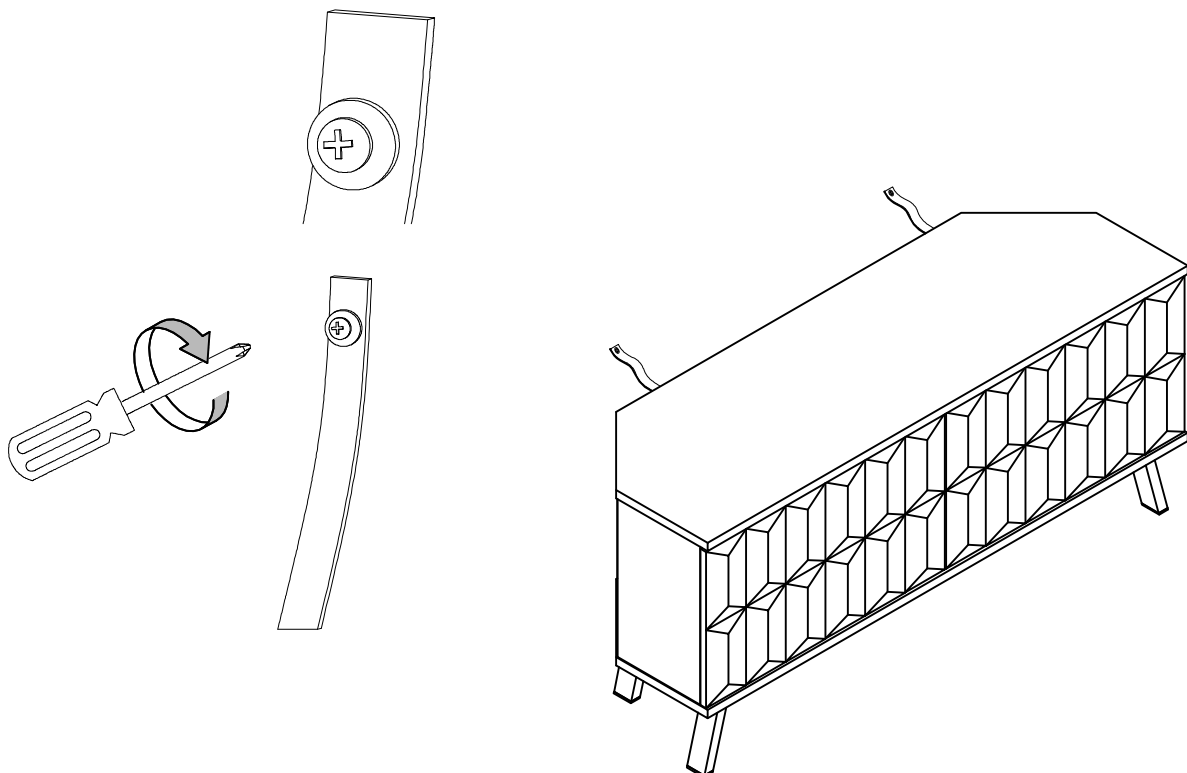

CAUTION:
Where wall fixings are supplied it is essential that these are used to provide additional stability in order to avoid the furniture toppling over with risk of injury.
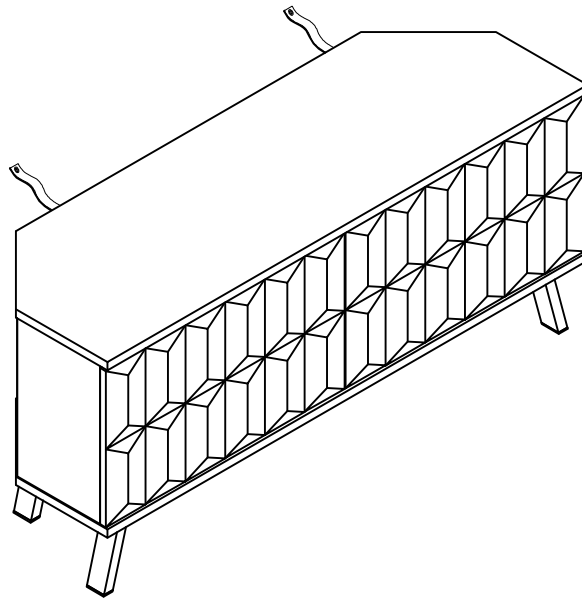

CAUTION:
Always ensure the area to be drilled is free from hidden electrical wires, water and gas pipes.

19

Finish - Remove all visible stickers when assembly is fully completed.

CLEANING ADVICE:
To avoid scratching the surfaces, clean only with a non abrasive cleaner.

NOTES ON SETTING UP WIFI

The LEDS lights only work on **2.4 GHz**, they will not work on 5.0 GHz

Most homes are 2.4 GHz or operate a dual function. If for any reason the LED lights are not connecting to the app or Alexa, please check the router setting. Most routers will operate both 2.4 and 5.00 GHz so there should be no problem.

In commercial premises, there maybe software to block access connection to unknown apps or services. If this happens, please check with IT Department.

The system will work from a mobile WiFi hotspot from one phone to another. We recommend this approach if there are access issues.

Ensure Bluetooth setting is on.
