Assembly and Safety Instructions

ASSEMBLY AND SAFETY INSTRUCTIONS

Thank you for your purchase! If you have any questions, issues or recommendations please feel free to reach out to us.

Please pay close attention to the following instructions in order to reduce the risk of injuries, accidents or damage to the product by itself.

IMPORTANT

Please follow ALL safety instructions listed below.

Please remove the packaging material before assembling or using the product.

Please make sure that all listed parts are included in the package and that they are not damaged.

Please read these assembly and safety instructions carefully before usage of the tent and keep it for future reference.

This product should only be used in a non-commercial way.

SAFETY INFORMATION

The tent was not tested for wind and snow loads, unless that is clearly indicated otherwise. Therefore, these loads are not covered by guarantee. Please watch the weather forecasts to be able to properly protect or disassemble the tent before problems appear.

Tents should only be used as temporary accommodation and should be disassembled in adverse weather conditions.

Make sure to keep sufficient distance to houses as well as gas and power lines to avoid possible damage. Please check the area for power cables and gas lines. Ask your local authority for further information if needed.

When making use of suitable heaters, keep a minimum distance of 1.2 m to tarp material. Open fire or heaters with open flames such as patio heaters, umbrella heaters, gas heaters etc. should NOT be used inside the tent in any case.

The person taking care of the construction of the tent is responsible for adequately securing it to ensure its safety. Please check the anchoring constantly to avoid damage. A stable anchoring can extend the endurance of the tent.

In order to ensure your own safety, please make sure to wear a helmet, gloves and solid shoes. The metal parts could have sharp edges and could be oily because of rust prevention treatment.

Please make sure that there is no permanent snow load. It should be removed right away. The same applies for rain and other forms of load.

Warning - please keep plastic and small spare parts out of children's reach. The thin film may cling to nose and mouth and prevent breathing.

ASSEMBLY & USAGE

Please reserve some more time for your first installation of the tent. The rules to be followed when pitching the tent are simple. Please use the illustrative instructions for each step of installation.

The screws joining the pipes with connectors must be tightened manually, using a hexagon key or an automatic screw driver, set at a max. level 2, to avoid material wear.

Metal parts have been covered by a thin oil film. Some parts may have more than the ordinary amount of lubricant on them. In such a case, use a cloth to remove excess oil. Please excuse us for that.

CAUTION - Please make sure that no one is harmed during the assembly process, especially when lifting heavy parts.

The tent should only be assembled by at least two adults. Please keep children away from the tent while assembling it to protect them.

Please make sure to find a flat and even ground base that is suitable for the assembly of the product and its intended usage.

Use only those materials provided with the tent upon delivery.

The tarps should not come into contact with any objects with sharp edges.

The tent can be used during temperatures close to zero. However, prior to such use, the tarp material must be stored at a temperature of at least 10°C. Please make sure that the tarp does not break when folded.

Each country has varying regulations regarding movable structures (tents) and unmovable structures. Please ask your local authorities whether a permission must be obtained to pitch the tent. In some countries this depends on the size of the tent.

CARE & STORAGE INSTRUCTIONS

Any kinds of damages due to acts of nature (weather damage) are not covered.

Bungees are consumable parts. Used bungees must be replaced.

The tent can be used during temperatures close to zero. However, prior to such use, the tarp material must be stored at a temperature of at least 10°C. Please make sure that the tarp does not break when folded.

Strong winds may damage the product. Please do not leave the gazebo unattended for an extensive amount of time.

Exposure to sunlight may cause the color of the tarp to fade out. This has no impact on the usability of the firepit and is not considered a product defect.

Strong or expensive rain may lead to the accumulation of water pockets on the roof. These pockets need to be removed as soon as possible.

Please do not use aggressive chemicals to clean the tarp material. The best cleaning agent is water with a slightly alkaline reaction.

Do not make any modifications of the metal structure of the tent, such as for example, connecting and/or welding additional loads, making grooves and/or any deformations.

Please remove the tarp if the product is not in use to avoid damage.

We advise to dismantle the pavilion during bad weather conditions and winter season.

The tent / tarp should only be folded, packed and stored when fully dry. Please do not put any other objects on top of the tent / tarp when stored.

ENVIRONMENT & SUSTAINABILITY

Please help us take care of our planet by recycling this product after usage. Please do not dispose of the product or any of its components with ordinary garbage, but recycle it. If in doubt, please contact us or an authorized sales representative. We will be happy to help you recycle the product correctly, at the same time preserving the environment.
